### Description:

Gripe water is a traditional Indian remedy for relieving colic discomforts. It contains safe, fast and effective natural ingredients. Gripe water is a natural liquid, which provides relief for babies and children suffering from minor stomach discomforts due to gas, colic and hiccups. Handed down from generation to generation, it has been used in many parts of the world. Gripe Water is Alcohol Free trusted product in India for years.

Gripe is caused by muscle spasms and because of excess acid generated due to air bubbles formed in baby's tummy. When the air bubbles get trapped in a baby's stomach the stomach feels it is full of food, so acids are produced which would normally break down the food particles. These acids are not needed and can cause irritation. At the same time, because the stomach is full of air bubbles, its muscles are unable to relax causing cramps and spasms.

## *Perfumed Petroleum Jelly (25 / 50 ml)*

*Product Code : 10131510 / 10131511*

**Ingredients:**

Borax  
Perfume  
Ointment Base  
Natural Color as per required

**Usage:**

Apply Directly on Dry Skin to Trap the moisture of skin.

**Safety Warning:**

Caution: Skin Care Ointments are for external use only.

**Description:**

Dry skin may be the problem throughout the year, though it is usually worse during colder months when humidity is low. Proper skin care can help prevent and treat dry skin, as well as the itch often associated with it.

Dry skin has a low level of sebum and can be prone to sensitivity. The skin has a parched look caused by its inability to retain moisture. It usually feels "tight" and uncomfortable after washing unless some type of moisturizer or skin cream is applied. Chapping and cracking are signs of extremely dry, dehydrated skin.

Dryness is exacerbated by wind, extremes of temperature and air-conditioning, all of which cause the skin to flake, chap and feel tight. This type of skin is tightly drawn over bones. It looks dull, especially on the cheeks and around the eyes. There may be tiny expression lines on these spots and at the corners of the mouth.

The essential purpose of a Skin Care Ointment is to keep the skin moist, Lubricating agents, active ingredients of most of such ointments work best when applied while the skin is still wet; for example, just after a bath or shower. They don't actually add moisture to skin, but they do trap surface moisture onto the epidermal layer and seal it in.
